

## Day 4: Magical.

### Magical elimination of protected areas in Greece.

May 4th, 2020

May 5th, 2020

■ Unprotected ■ Protected

On May 4th, 2020, a new bill was passed by the Greek government that essentially eliminates all protected areas.

Greece is home to over 2000 native animal species and 1150 plant species that exist only in Greece.

This bill explicitly makes mining, hunting, oil extraction, and other destructive activities legal within protected areas.
